

Dalia

a containerized launcher with a GUI for multi-agent-systems written in [DALI](#).

Pre-Requisites:

1. install [sicstus](#)
2. clone [DALI](#):
 - check the compatibility table [DALI-DALIA Compatibility](#)
 - e.g.

```
git clone --branch 2024.10 --depth 1 https://github.com/AAAI-DISIM-UnivAQ/DALI
```

3. install [docker](#)

Installation

1. clone [DALIA](#)
 - check the compatibility table [DALI-DALIA Compatibility](#)
 - e.g.

```
git clone --branch 2025.09 --depth 1 https://github.com/alyshmahell/dalia
```

2. navigate into the cloned repo:

```
cd dalia
```

Usage

```
./run --sicstus <path_to_sicstus_directory> --dali <path_to_dali_directory> --src <path_to_mas_directory>
```

- `path_to_mas_directory` is the path to the multi agent system you've written using [DALI](#), you can use the `example` directory found in this repository in `path_to_mas_directory` when getting started.
